

Product **PROFILES**

Infinity Canopy

Infinity Canopy is a modular slide-on-wire canopy that is highly versatile, adaptable, and sustainable. It is composed of individual shade panels that are connected by a marine-grade stainless-steel and aluminum frame. It can be installed on pergolas or (as shown) between any two opposing structures. The shade panels are available in a variety of colors and are made of the highest-quality awning fabrics, including Sunbrella® and Phifertex. The panels can be ordered in one or multiple colors—and with two or more colors, the panels can be placed in different patterns to create unique designs not possible using any other shade system. Vertical panels can also be added to one or both ends of the canopy for additional shade and

privacy. Unlike other shade products, Infinity Canopy can be modified within minutes, making on-site repairs and changes to the color and design of the canopy possible and easy. Contact: (844) 422-6679 or www.infinitycanopy.com.
